DETAILED ACTION

Drawings

1. The drawings were received on 11/14/03. These drawings are acceptable.
2. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Waldern et al.

Waldern et al. (US Patent Number 6,407,724 B2) discloses the method for projecting light from an image projector (column 15, lines 61-64), in response to an image information signal, controllably refracting said projected light, in response to a first control signal (column 16, lines 12-15) for projecting refracted light for providing viewable images of varying extent, and controllably refracting said viewable images in response to a second control signal for viewing said images of increasingly smaller extent with correspondingly increasing magnification (column 16, lines 15-18). A first optic (292) for controllably refracting said projected light, in response to a first control signal (Figure 15) for providing light rays of varying extent, and a second optic (293) for controllably refracting said light rays in response to a second control signal (Figure 15) for providing light rays of increasingly smaller extent at correspondingly decreasing focal length (column 16, lines 24-30).

Allowable Subject Matter

5. Claim 2 is allowed.

Response to Arguments

6. Applicant's arguments filed 11/14/2003, with respect to claim 2 have been fully considered and are persuasive.
7. Applicant's arguments filed 11/14/2003 regarding claims 1 and 3 have been fully considered but they are not persuasive.

8. Regarding claim 1, the applicant has argued that the prior art does not teach an "image information signal", means for "providing viewable images of varying extent" and "controllably refracting the viewable images in response to a second control signal for viewing the images of increasingly smaller extent with correspondingly increasing magnification". However, Waldern et al. (US Patent Number 6,407,724 B2) teaches said limitations. This is taught in column 16, lines 12-18.

9. Regarding claim 3, the applicant has argued that the prior art "is not capable of being controllable refractive". However, Waldern et al. (US Patent Number 6,407,724 B2) teaches said capability of being controllably refractive. This is taught in column 14, lines 28-33.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
